25+ years of experience applying technology solutions to business problems. Desire to use talents and skills in challenging positions that allow for personal and corporate growth.

- quick learner, eye for detail, technically sound
- determination in every challenge, highly motivated, self-starter, pro-active
- capable of quickly making important decisions, versatile in adapting to the unexpected
- history of successfully pairing user needs with ad-hock technical solutions through analysis, design, implementation and training/support

Computer expert, GNU/Linux enthusiastic, Unix lover and Free & Open Source Software supporter. He has transversal skills gathered in his several job experiences, which grants him huge flexibility and versatility; also he has good skills as a liaison with customers and in training people. Having an optimization-oriented mind, he loves to automate, improve and optimize systems to achieve the maximum performances with less effort and human intervention.

Able to work both alone and in a team, is very good at interacting with technical personnel and final clients/customers where it is important to communicate complex technical concepts with simple words, clearly and concisely.

Exceed 2,300 hours in teaching basic, advanced, programming, database and largely GNU/Linux system administration computer courses, especially as preparation to gather a Red Hat Linux or LPI Certification.

He always brought a positive personal contribution to his job environments, for instance:

- as Team Leader & SysAdmin in ESA he contributed in keeping up & running Envisat-1 satellite platforms (development, test, and production in all its three Data Centers in Italy, Sweden, and Spain), renewing all the IBM H/W platforms, writing automation scripts, doing the inventory of all the satellite spare parts, organizing whole documentation in a CVS shared server;
- as Platform Architect & Linux Specialist in Anritsu Group, he conceived a new platform to meet the company's clients need of disk space management and performances building a new Linux/Oracle *platform* whose complete automatic installation guaranteed simplicity, security, rapidity, and reliability;
- as System Admin in Intesa Sanpaolo Bank wrote a multitude of scripts and user tools, largely still in operation today, which automate the bank systems controls and operations, and ease team member's daily work;
- as Computer Store Manager in Euronics, in 18 months doubled the income of the company's computer section he managed for the trust he established with customers, because of the smile, kindness, availability to listen to them, comprehend their problems and finally to sincerely and technically advise them at the best in their buying choices.

- Job positions held: Data Center manager, Team Leader, Platform Architect, Linux/Unix System Administrator, Oracle DBA; Computer Professor & Instructor; Graphic Designer; Computer Store Manager.
- Companies where he worked include: European Space Agency (ESA), Telecom Italia, Intesa Sanpaolo Bank, Anritsu Group, Ireland fabless companies Silicon & Software Systems (S3) and Movidius Ltd.
- Companies and clients taught include: Italian Minister of Justice, Italian Minister of the Interior, Government Police, RAI Italian Public radio/television, Telecom Italia Spa, IGT (Lottomatica Group), Real Group, Engineering Spa, Almagiva Spa, Serco Group, Energent Spa, Italian Army, United Arab Emirates Army, LUISS University.
